

Business Process Modeling In Microsoft Visio®

## Business Clarity. Create & Share Business Processes.

Integrated into Microsoft Visio®, Charter allows you to quickly and easily create, view, edit and publish your business process models.

**Quickly create models with Charter's built-in model wizard, drag and drop functionality, customizable templates, icons, and automatic validation of your models. Charter uses the powerful process hierarchy approach to business process management.**

### key benefits.

#### **Create a Process Knowledge Base**

Link any documents such as procedure, forms, Spreadsheets, URLs, and text files documenting experiences for knowledge management.

#### **Capture Key Process Information**

Bring rich context to your process maps by collecting and displaying process related information, including process ownership and accountability.

#### **Bring Clarity to your Business Processes**

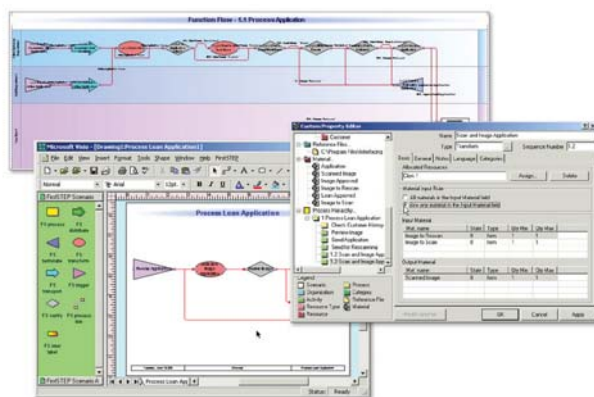

Visualize process interaction between organizational units in the auto-generated swimlane/functional process view. Charter's unique "flatmap" view presents the entire process hierarchy collapsed into a single view.

#### **Continue to Refine and Advance Your Business Processes**

Seamless integration with Interfacing Designer allows you to perform simulation and analysis. Export your Charter Models to Interfacing's Enterprise Process Center for multi-user, collaborative business process management.

#### **Publish Your Process Models In HTML**

Users can publish process models to HTML and other formats to share business knowledge with other users.

Interfacing Charter is compatible with Visio 2000, 2002 and 2003.

## automatic model structure validation.

Validate the underlying structure of a model with Charter 5' built-in Validator. During verification, the Validator examines and collects information on the process pages, model data and the proper use of inputs and outputs and automatically notifies you of problem areas. Ensure model validity with Charter's new Validator.

## feature list.
